Re: RELATING TO M&P CONTRACTROS WALES Ltd

PRINCE CHARLES HOSPITAL EMERGENCY CARE CENTRE & DAY SURGERY

We have recently appointed M&P Contractors on our Day Surgery project at Prince Charles Hospital in Merthyr Tydfil.

It is the first time that M&P have worked directly for Laing O'Rourke and was primarily appointed due to their proactive approach to a demanding programme, technical knowledge of the product and commercial awareness when dealing with interface detailing.

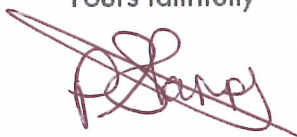

The works undertaken were Kingspan SFS framework to the façade and associated vapour barriers, cementitious boarding and associated fixings.

The works have now since been completed on time, to an excellent quality standard, safely and with no commercial issues.

This is a merit to both the Directors and site management who remained proactive and dedicated through out the preconstruction to post completion stages.

Laing O'Rourke have since offered more opportunities to M&P based on their performance at Prince Charles Hospital

Yours faithfully

Peter Sharpe
Project Leader
