Re: M&P Contractors Wales Ltd Reference – Archbishop McGrath Catholic School

Dear Sir/Madam,

M&P Contractors Wales Ltd were appointed to install the Structural Framing System, air tightness membrane and Cementitious board to the facades of the project. They also installed the insulated render system to several elevations of the same build.

During their time on site, I found M&P to be a very professional outfit, capable of managing the sequence of operations on the site in a timely manner, working and coordinating daily with Leadbitter and the other sub contractors on site. They played a large part in the problem solving on site and always offered practical solutions to any issues raised.

They proved themselves time after time to be proactive in their approach to Health and Safety and more than happy to assist in the overall environment, taking a holistic approach to Health and Safety. Their operatives always acted professionally and were a credit to the company.

I would have no hesitation in appointing them on any future work and look forward to working with them again.

Yours truly,

Simon Burford
Project Manager
Leadbitter Construction
