To whom it may concern

Dear Sirs,

RE: Hartridge High School, Newport.

M&P have recently completed the envelope on the aforementioned Project, which was completed on time and within budget.

The works package involved the design, supply and installation of Kingspan structural metal stud, vapour barrier, rigid insulation and Weber render with various colours to the same elevations.

M&P always ensure a very professional approach while installing their works; their Health & Safety documentation is to a very high standard, which is followed through onto Site by well trained operatives who are supported by a very committed office.

They have constantly scored highly on safety inspections and have scored well above average on our KPI's

Leadbitter would have no hesitation recommending M&P as they have also successfully completed similar works at Bettws Comprehensive School Newport and Archbishop McGrath School Bridgend.

Additionally, M&P have just commenced work on our super school project in Bridgend and we would class them as a category A contractor/partner.
