To Whom It May Concern

Re: **M&P Contractors Wales Limited**

M&P were appointed for the design and installation of the SFS external walling and internal partitions and ceilings at Ysgol Bro Dinefwr, Llandeilo in June 2014. They worked very closely with our pre-construction team in the lead up to our final agreement of target cost with our client Carmarthenshire County Council which included an element of value engineering to achieve best value.

M&P's final bid was competitive and during the final negotiation they were very close to their competitors, so much so that the final choice for this large package was dependent on the quality of their submission, health & safety performance and approach, the high calibre site management team proposed, programme, their ability/willingness to work closely with our team and solve problems and their overall professionalism.

During their time on site, all of the above expectations have been met and we continue to work well with their team and look forward to its continuation up to practical completion, handover and beyond into the DLP period. I would highly recommend M&P to any educational or other projects as they clearly have the experience, skills and know how to deliver these projects on time, provide the installation to specification and of the highest quality and co-ordinate and collaborate with our site team and other contractors in order to achieve the projects aims.

Finally, M&P's approach to health & safety is of a very high standard with all of their supervisors being competent and qualified, they embrace the Black Hat ethos by attending morning briefings and Black Hat health & safety inspections, PPE is of a very high standard and compliance i.e. glasses & gloves, use of mechanical pop-ups where possible and practical over aluminium towers is extensive and their philosophy and approach to health & safety can be clearly seen at site level with their workforce embracing the high standards.

Yours faithfully,

Martin Phillips FCIQB
Project Director
Wales - Western
