To whom it may concern.

RE: Project: ISV Morrison Flats, Cardiff Bay

Dear Sirs,

I write with regard to the above project. M and P Contractors have been employed on the site to install the SFS & Cladding envelope, as well as all the internal partitions and ceilings to circ. 170 flats. The proactive approach of M and P management and operatives has been key in completing what has been a complex package due to the project being split into 2 sites, with 2 blocks on each Site and with restricted access.

Both the internal and external works have been completed to a very high standard and the general quality of finished works is excellent.

M & P operate a quality control system that has ensured this project has been a success; which sets them apart from other Dry Lining Contractors.

During their time on site, I found M & P to be a very professional company, capable of managing the sequence of operations in a timely manner and their collaborative approach is first class.

Finally, M&P's commitment to health & safety is of a very high standard with all of their supervisors being competent and qualified. Their philosophy and approach to health & safety can be clearly seen at site level with their workforce embracing the high standards set.

If any further information is required, do not hesitate to call 07500-665632, as I have no hesitation working with them again on future projects

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Simon Owen", with a blue circular stamp or seal to its right.

Simon Owen
