Dear Sirs

Project SLAM
A5001 – RMA Sandhurst

I am writing to convey my thanks for the excellent work your team under the supervision of your site manager Neil Huntley carried out on the above project.

Even though your company were not a member of our direct supply chain, the input that Neil put in to the project made him an integrated part of the sites management team.

Neil's diligence and the resources your company supplied, was an important contributory factor in successfully completion of the project to a high standard as expected by our project team, client and the end user.

I again wish to thank you for your commitment and look forward to working with your company in the near future.

Yours sincerely

Ed Larkin
