RE: Project: Ebbw Vale, Learning Zone

Dear Sirs,

I write with regard to the above project. M and P Contractors have been employed on the site to install the Kingspan SFS envelope and all the internal partitions and ceilings. The proactive approach of M and P management and operatives has been key in completing what has been a complex package due to the interfaces with the steelwork and brickwork support systems, cladding and solar shading.

Internally, acoustics, fire stopping and air seal details have been completed to a high standard and the general quality of finished works is excellent. Specialist and supplier inspections have been completed as scheduled. Materials are available when required and labour resources increased as the programme dictates. Site management attend daily programme and safety briefings and all statutory inspections are submitted weekly.

In general it has been a successful project for both Leadbitter and M and P Contractors, with high standards of safety and quality. If any further information is required do not hesitate to call the writer on 07762-950316

Yours sincerely,

Leadbitter Construction

Gareth Rowden

Senior Project Manager
