For the attention of Mr Paul Davies,  
RE: Company Reference for M&P

**To whom it may concern**

Since M&P appointment to Supply and Fix the SFS frame work, cement board and application of the external render cladding – in addition to the suspended ceilings within the under crofts on the Gateways to the Valleys Project (1600 Secondary Education School) We confirm that M&P were very well organised and professional in their approach to all aspects of their sub contract works. Regular timetabled meetings were organised with the appropriate staff which was always attended by their senior managers to aide progress and any site issues raised was resolved promptly. M&P was instrumental in the initial legacy of their works to assist within the design development which benefited from early procurement.

The company was very efficient in returning emails and / or telephone calls and maintaining adequate and reliable resources to achieve critical milestone dates.

Their sub contract works was managed well which resulted in high KPIs being recorded for internal reporting. M&P worked well with the other contractors and developed an excellent close working relationship with the Principle Contractor

We would highly recommend their services to any potential employer

Yours sincerely

Mr H Monsen  
Senior Project Manager
