To Whom it may concern

**Re: M&P Contractors Wales Ltd.**

**Bristol Haematology & Oncology Centre**

We have recently successfully concluded the £12m extension and refurbishment to the Bristol Haematology & Oncology Centre where M&P Contractors Wales Ltd played a pivotal role in both the new build and refurbishment elements. All of the work had to undertaken alongside a fully operational hospital with limited logistical access.

I have had the pleasure of working with M&P Contractors Wales Ltd on another project where they provided the partition and ceiling package, and this was a major factor in selecting them for the work at the Bristol Haematology & Oncology Centre.

Their approach to the work, which was both challenging and demanding was very proactive throughout the project and their technical knowledge of products and commercial awareness when dealing with interface details was key to the success of the project. All the works were completed safely, to budget, to an excellent quality standard and within the programme time.

The key to the success of M&P Contractors Wales Ltd is shown at all levels in their organisation, where they are all very proactive, communicate clearly and are dedicated throughout the whole process, from pre-construction to post completion stages.

Laing O'Rourke recognise M&P Contractors Wales Ltd as a key supply chain partner and have no hesitation in offering more opportunities based on their excellent performance at the Bristol Haematology & Oncology Centre where M&P .

Regards,

William Marfell  
Project Leader
