To Whom It May Concern

I am writing to confirm that M & P Contractors have purchased six top-of-the-range green beam lasers from us over the last couple of years. These lasers emit a beam which is over four times brighter than a standard red beam laser, something that no other manufacturer can offer. The lasers are extremely quick and easy to use, with some contractors reporting an increase in productivity of over forty per cent.

Mr Huntley has also recently purchased a number of PLS-5 lasers, which are proven to increase productivity significantly. This laser instantly gives the contractor a plumb beam and ninety degree shot from both faces and is the most accurate of its type on the market (>3mm @ 30m).

All of Mr Huntley's instruments are regularly maintained and calibrated using the latest equipment in our modern Cardiff office by our highly trained technicians, who between them have over fifteen years of experience of working with lasers.

If I can be of any further assistance to you, please do not hesitate to contact me.

Best Regards
