

M&P ENVIRONMENTAL POLICY STATEMENT

M&P Contractors Wales Ltd recognizes the importance of environmental matters and are committed to environmental protection and the prevention of pollution as a key part of our business decisions.

We will work towards the following objectives:

- Comply with relevant environmental legislation, regulation and industry codes of practice.
- Provide for the publication of the environmental policy internally by posting the document on the Company notice boards. The policy will be available externally to all interested parties, upon request.
- Provide for the setting and achievement of environment objectives/targets for the Company based on our significant impact, and for the publication of these within the business.
- Maintain efforts to achieve continual improvements in environmental performance of our policies, programmes and operations taking into account technical developments, scientific understanding, customer and community expectations.
- Develop services that have minimal environmental impact and are safe in their intended use. Our considerations will include spillage prevention, waste management, natural resource consumption, and energy efficiency practices.
- Conduct and support assessment of the environmental impacts of new products and services before starting a new activity or Project.
- Measure environmental performance by conducting reviews and assessments of compliance with this policy statement, ensuring our legal and Company requirements are achieved.
- M & P are committed to their compliance with ISO 14001:2004

We believe that businesses are responsible for achieving good environmental practice and should operate in a sustainable manner. This Policy will be communicated to our employees and those working on behalf of M&P

My statement says, let's look after today..... ensuring a better tomorrow!

Mark Trevelyan Huntley, Managing Director, Jan 2016
