To Whom It May Concern

I am writing in reference to M&P Group who I had the pleasure to employ recently to undertake the SFS, Dry lining/Partitioning & Suspended Ceiling contract for Willmott Dixon on Eastern Community Campus, Trowbridge Rd, Cardiff.

The project itself was a £27 million pound new build secondary school for Cardiff City Council which was built within budget and on time during the period of July 2016 to December 2017 and consisted of a traditional steel framed building with SFS & brickwork envelope, internal dry lining with a combination of both MF & suspended ceilings.

Throughout the project it was a pleasure to work with such a pro-active contractor whose attitude to health and safety was second to none and set the standard for others to follow resulting in a site that had no reportable injuries and accidents. On a number of occasions M&P operatives were rewarded with recognition for safety by the Willmott Dixon site management.

In addition to this M&P's supervisor's willingness to work with the other supply chain on a daily basis and ability to provide third party technical support when requested coupled with extremely competent and experienced workforce enabled them to produce a first class quality finish.

It is also worth noting that the programme period was demanding from the outset and M&P were able to provide Willmott Dixon with assistance and support required to finish the project on time and within budget.

I would you recommend M&P to any other potential clients and would hope that I will be working with them again in the very near future.

If you require any further information please feel free to contact me on 07971095770 or alternatively jarrad.owen@willmottdixon.co.uk.

Yours truly
